

Observed fluxes vs. model fluxes at the gridpoint defined by peaks of the 1D marginalised prior PDFs

| Line     | Galaxy Name | In_lhood? | ... | Resid_Std | Obs_S/N | d |
|----------|-------------|-----------|-----|-----------|---------|---|
| oiii4959 | rf0209      | Y         | ... | -0.0457   | 1.      |   |
| hbeta    | rf0209      | Y         | ... | 0.0000    | 4.      |   |
| oiii5007 | rf0209      | Y         | ... | -0.3313   | 2.      |   |
| nii6548  | rf0209      | Y         | ... | -22.8330  | 6.      |   |
| halpha   | rf0209      | Y         | ... | 0.0009    | 7.      |   |
| nii6584  | rf0209      | Y         | ... | -22.3844  | 6.      |   |
| sii6717  | rf0209      | Y         | ... | -5.5191   | 5.      |   |
| sii6731  | rf0209      | Y         | ... | -7.5920   | 5.      |   |

[8 rows x 6 columns]

$\chi^2 = 277.7$

$A_c = 1.1$  mag
